

SNS COLLEGE OF TECHNOLOGY

An Autonomous Institution

Accredited by NBA – AICTE and Accredited by NAAC – UGC with ‘A’ Grade
Approved by AICTE, New Delhi & Affiliated to Anna University, Chennai

Department of Computer Science and Engineering

Course Code & Title : 23AD0201 - Data Science Fundamentals

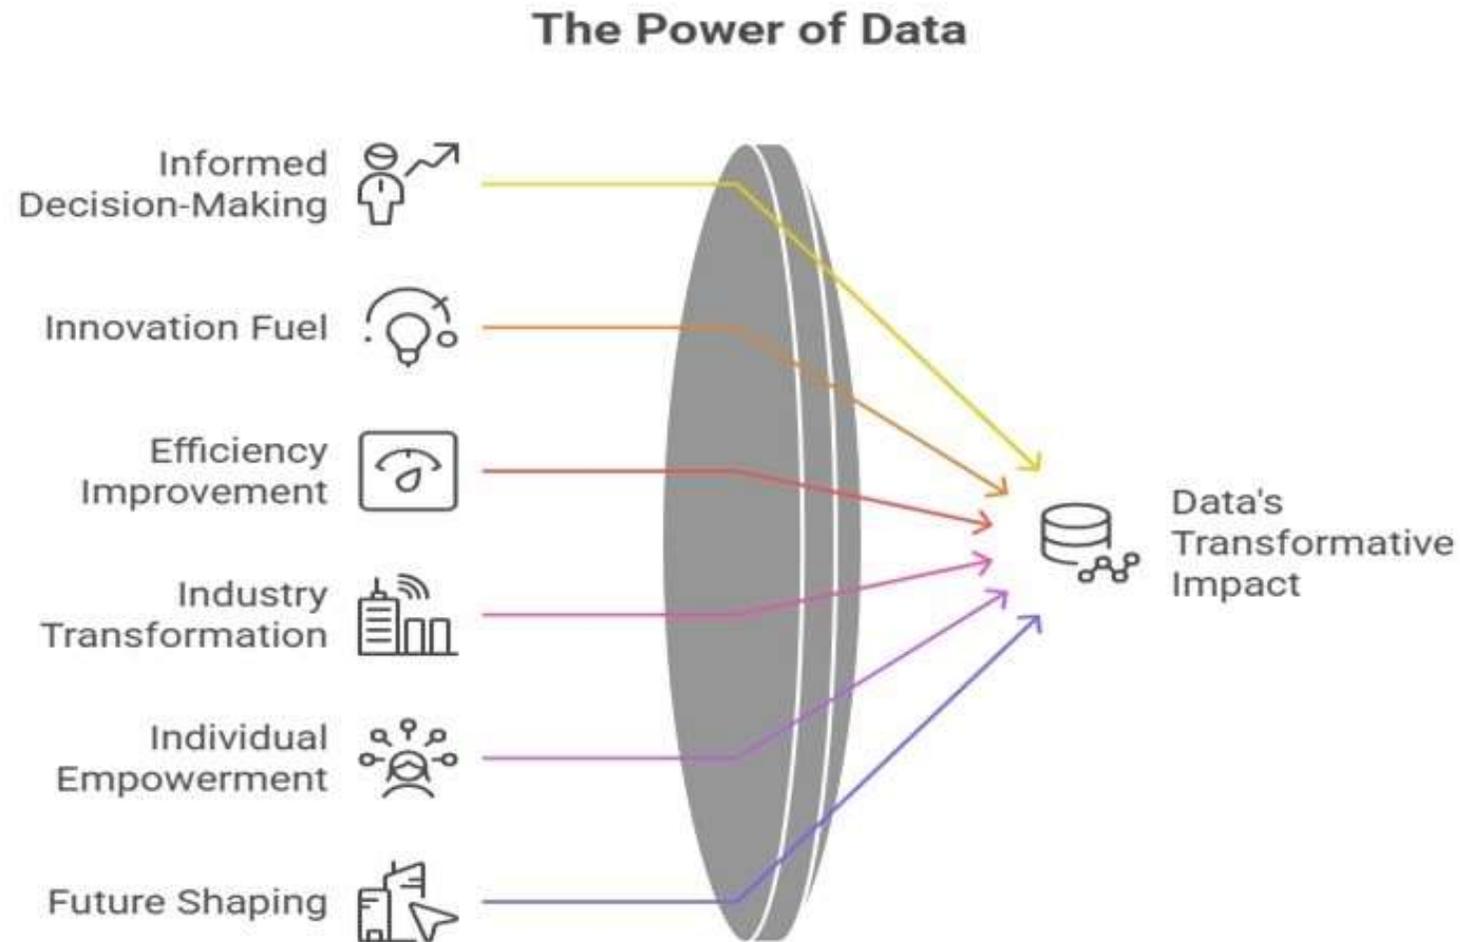

III YEAR / VI SEMESTER - EEE

Unit 1 - INTRODUCTION TO DATA SCIENCE

Topic : Benefits and uses, Facets of Data, Data Science Process

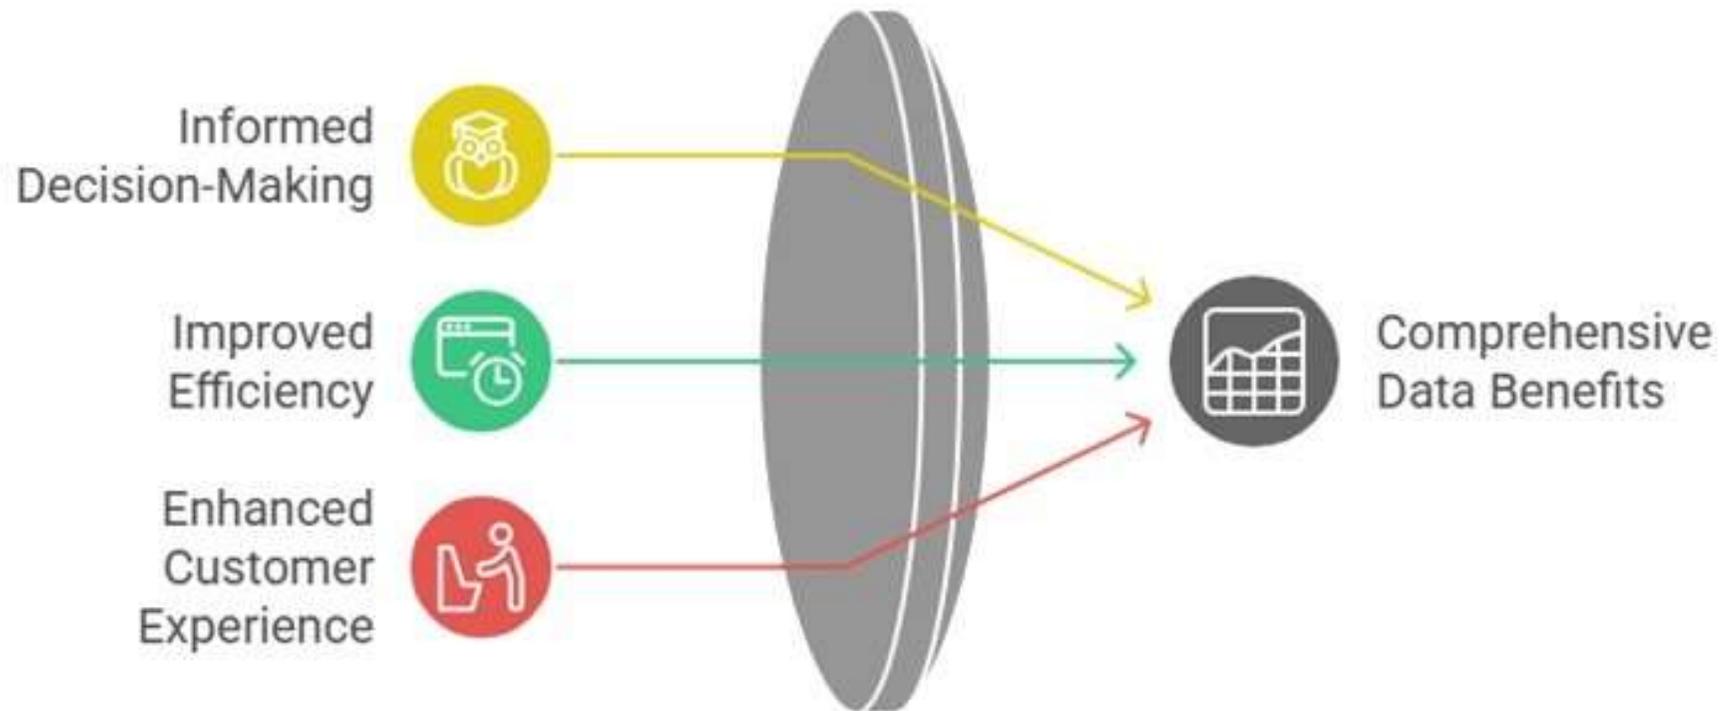

K.Karthikeyan AP/CSE

RECALL IN POWER OF DATA

EMPATHY IN UNLOCKING DATA POTENTIAL

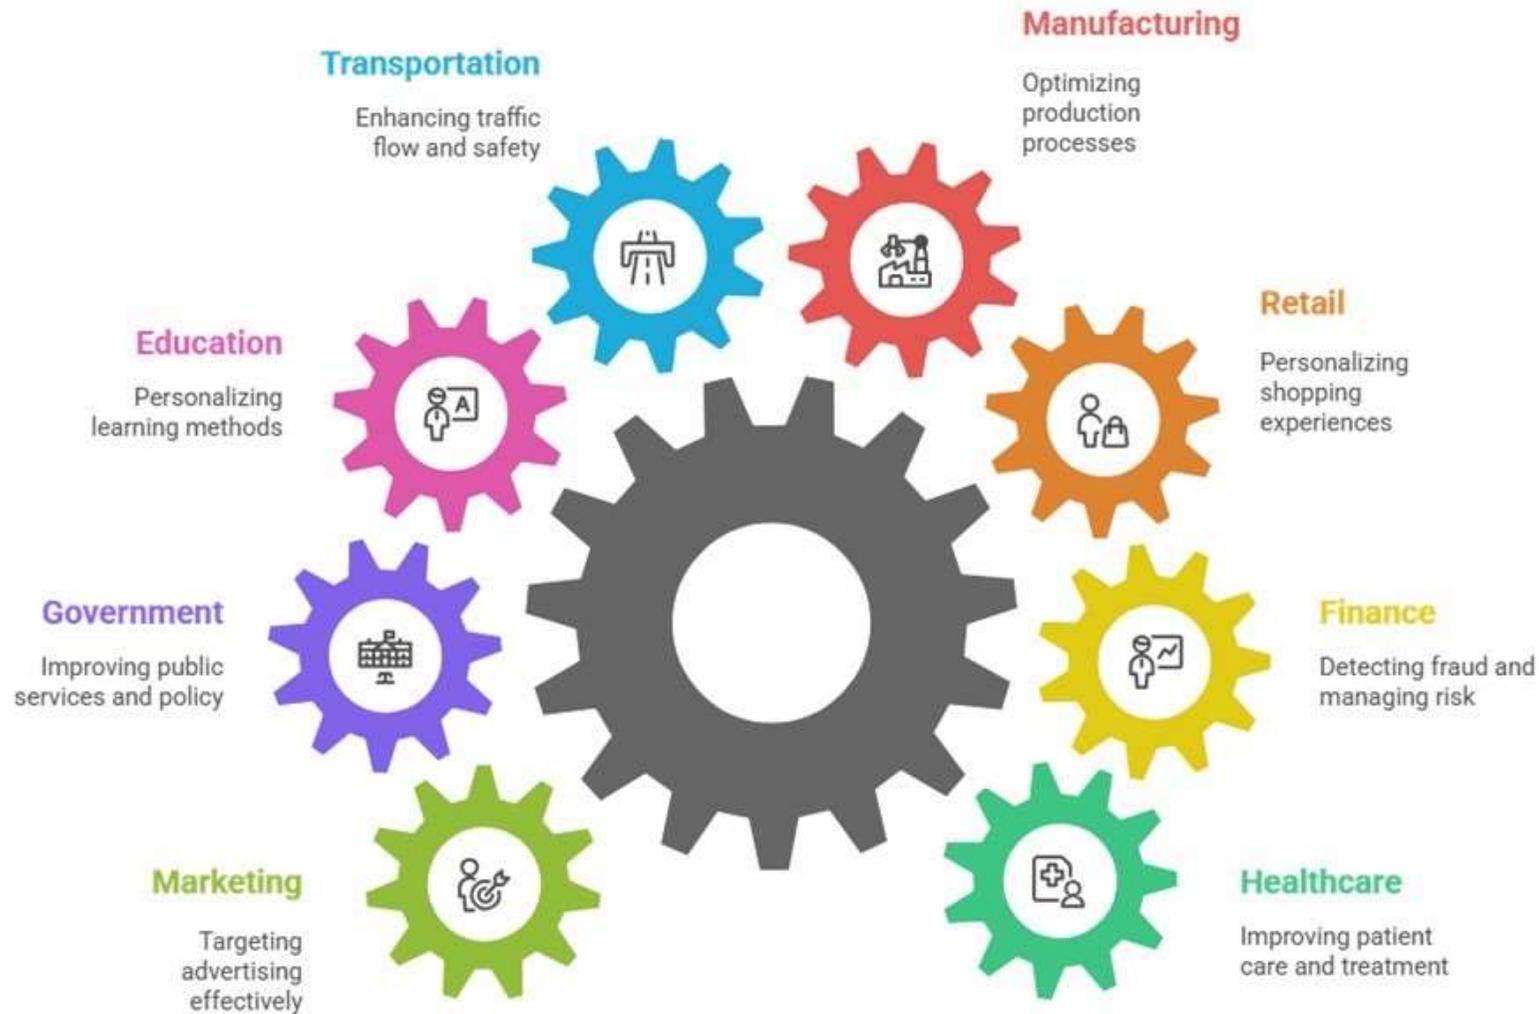

Unlocking Data's Potential

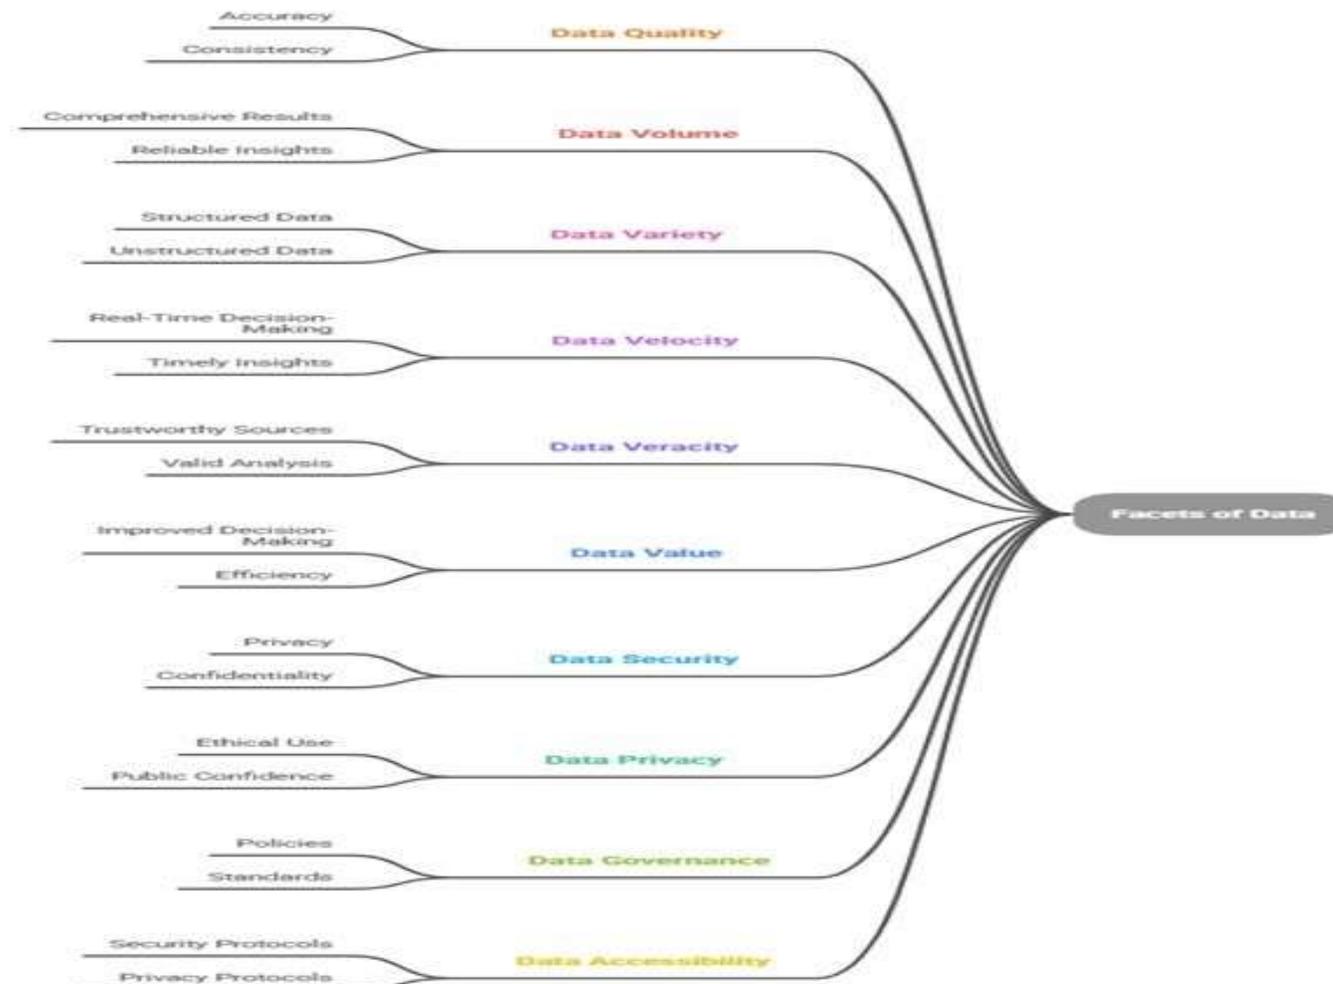

Data-Driven Business Transformation

Data Applications Across Sectors

Facets of Data: Value and Impact

Made with  Napkin

Activity

Activity: Understanding Data and Data Science

Objective

To understand the importance of data, its facets, and the steps involved in the data science process through real-life examples.

1. Benefits and Uses of Data (Activity)

Activity Task:

Students list real-life examples for each benefit of data.

Benefits & Uses:

- **Decision Making:** Data helps organizations make accurate and informed decisions.
- **Business Optimization:** Improves efficiency, reduces cost, and increases profit.
- **Predictive Analysis:** Predicts future trends like sales, weather, or demand.
- **Customer Insights:** Understands customer behavior and preferences.
- **Risk Management:** Identifies risks and prevents losses.
- **Innovation:** Helps develop new products and services.

Example:

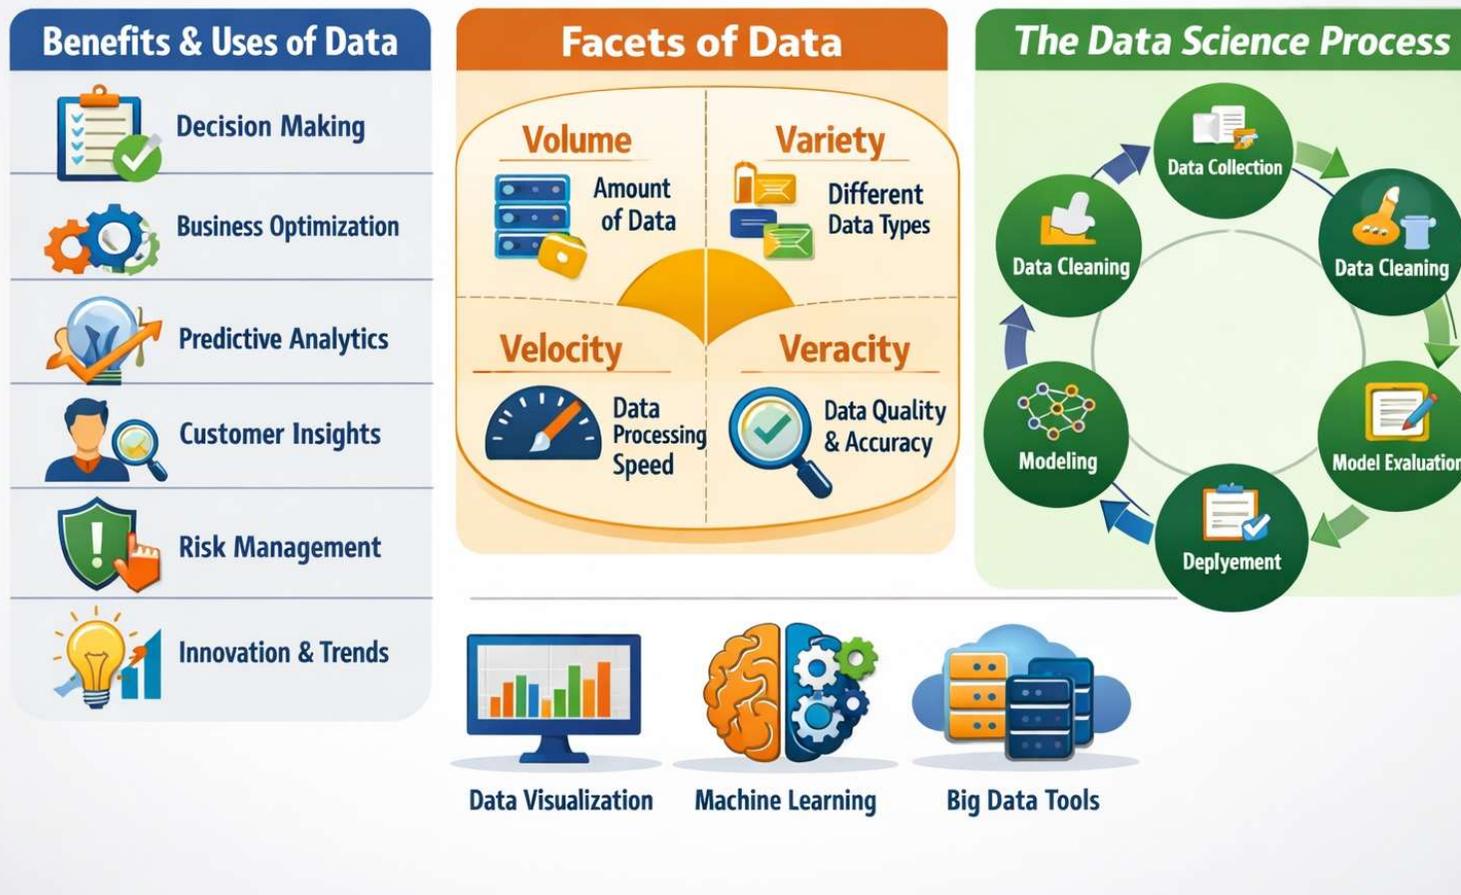

Online shopping apps use customer data to recommend products.

How to address challenges in working with data?

MIND MAP

Facets of Data & The Data Science Process

ASSESSMENT

MCQs: Data and Data Science

A. Benefits and Uses of Data

1. Which of the following is a major benefit of using data in organizations?

- a) Guesswork
- b) Decision making
- c) Manual work
- d) Trial and error

Answer: b

2. Data helps businesses to understand customer behavior. This is known as:

- a) Risk management
- b) Data storage
- c) Customer insights
- d) Data cleaning

Answer: c

3. Predicting future sales using past data is called:

- a) Data collection
- b) Predictive analytics
- c) Data entry
- d) Data variety

Answer: b
