External Body Parts: Looking Different

Everyone has common body parts such as two hands, two eyes, two ears and two legs. But some differences are:

Different Heights

Different Hair colors

Different noses

Different skin colors

Different eye colors

Different body weights

Looking Different

Body Movements

We can move our Hands, Legs and Face in many ways.

We use body movements to work and play.

Some common body movements are walking, hitting, skipping, jumping, kicking and writing.

Body Movements

Walking

Walking is to move with feet.

Hitting

Hitting is to move hands from back to front and side to side.

Body Movements

Skipping

Skipping is to hop foot rope.

Jumping

Jumping is to move quickly off the ground with legs.

Body Movements

Kicking

Kicking is to hit with your foot.

Writing

Writing is done using hands.

Sense Organs – Eyes

Eyes help us to see things.

Sense Organs – Ears

Ears help us to hear music & sounds.

Sense Organs – Nose

Nose helps us to smell the things.

Sense Organs – Tongue

Tongue helps us to taste the thing.

Sense Organs – Skin

Skin helps us to feel things.

Thank You !!!
