By domesticating horses and camels, we are able to attach carts to them for faster transportation.

2. Write a short note on

a. Cave Painting

b. Smoke signals

c. First typewriter

a. Cave Painting

- Early humans painted stories of what they saw and experienced on rocks and cave walls.
- It is believed that they used the paintings to communicate to their people, since language do not exist during that time.

b. Smoke signals

- The soldiers guarding the great wall of China first used smoke signals to send secret signals to each other.
- The guards would lit a fire signaling from tower to tower along the wall.
- This would alert the other soldiers about threat.

c. Type writer

- Writing is a good way to communicate with others.
- Type writers were invented, which helped people to type letters to the paper.
- Type writers become the standard for official communication.
