## Data Handling

1. The weights (in kg.) of 15 students present in a class are:  
38, 42, 43, 35, 37, 45, 50, 32, 43, 40, 36, 38, 43, 38 and 47  
(a) Determine the Mode and Median of the above data.

(b) Is there more than one Mode possible?

2. In a public library, the following observations were recorded by the librarian in a particular week

Days	Mon	Tues	Wed	Thurs	Fri	Sat
Newspaper Readers	400	600	350	550	500	350
Magazine Readers	150	100	200	300	250	200

Draw a double bar graph choosing appropriate scale

3. Age of 6 children of two groups are recorded as below

(a) Find the mode and range for each group.

(b) Find the range and mode if the two groups are combined together

Age in years	
Group A	Group B
7	7
7	9
9	11
8	12
10	12
10	12

4. If the average of the values 9, 6, 7, 8, 5 and x is 8. Find the value of x.
