Angles Around You

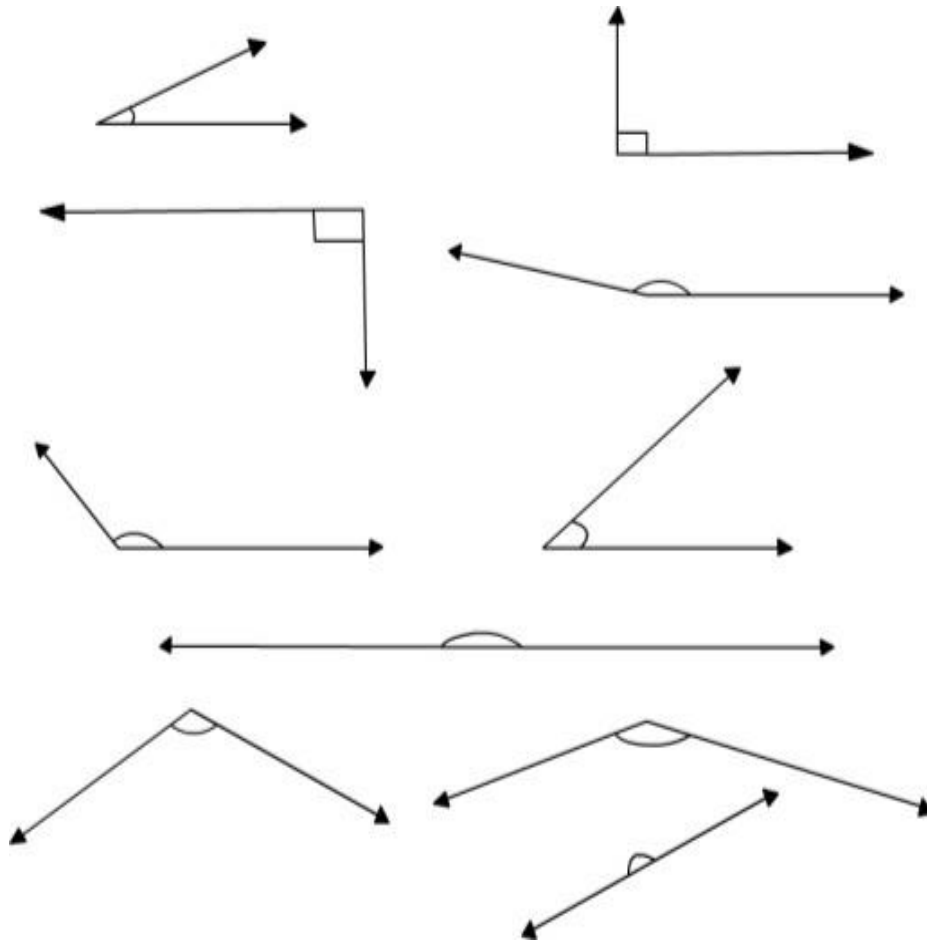

I. Look at the angle marked in the capital letter A. Find more angles in the letter and draw rays to mark them.

II. Measure the angles using a protractor:

**III. Categorise the angles as acute, right, obtuse or straight angles.
Write A if it acute, R if it is right, O if it is obtuse and S if it is a
straight angle**

**IV. Identify whether the dotted lines are lines of symmetry of
the respective shapes. Write Yes or No below the shapes:**
