Case based Questions

1.Why is it important to protect flowers and trees?

Protecting flowers and trees is crucial because trees produce fresh air, which is essential for our survival. Flowers, on the other hand, provide food for bees, which are vital pollinators. Without these natural elements, our environment would suffer significantly.

2.What alternative transportation is suggested, and why?

The children suggest walking a lot instead of always using a car. Walking helps reduce harmful car fumes, which in turn can lead to a clearer blue sky and a healthier atmosphere.
