

SNS COLLEGE OF PHARMACY AND HEALTH SCIENCES

SNS Kalvi Nagar, Sathy Road, Saravanampatti Post, Coimbatore -641035

B.Pharm I semester Pharmaceutical Analysis

2 Mark questions

Unit II :

Define acid and base

Write the formula for standardisation

Write the classification of acid base titration

Write any two indicators used in acid base titration

Give an example for weak acids

Write the application of non aqueous titration

What is leveling solvent

What is differentiating solvent

Write the various types of solvents in non aqueous titration

Why do we use mercuric acetate in assay of Ephedrine chloride

Why lithium methoxide is preferred over than sodium methoxide

What is the role of acetic anhydride in the preparation of perchloric acid

Write the titrant used in the non aqueous (alkalimetry) titration

Write the indicators used in the non aqueous (acidimetric) titration

Write the comment on perchloric acid
