

SNS COLLEGE OF PHARMACY AND HEALTHSCIENCES

PUZZLES - Unit II

PHARMACEUTICAL ORGANIC CHEMISTRY-I (BP202T)

Across

Down

4. Element central to organic molecules 1. Shape of a carbon atom with four single bonds
7. Additive that makes polymers more

Across

flexible

8. Energy source derived from burning hydrocarbons

9. Reaction type where one atom is replaced by another

10. Substance that reduces friction between moving parts

Down

2. Object that burns a solid hydrocarbon to provide light

3. Process of joining atoms by sharing electrons

5. Liquid that dissolves substances, often derived from hydrocarbons

6. Material that prevents heat or electricity flow, sometimes made from solid hydrocarbons
