Design Thinking in COENZYME

- **1.Empathize:** Deeply understand the student's or learner's challenges, needs, and experiences. This involves engaging with students, educators, and biologists to uncover pain points, preferences, and unmet needs in understanding microscopic cell processes.
- **2.Define:** Reframe the problem based on insights from the empathize phase and establish clear context. This involves synthesizing data to pinpoint the core issue, such as defining the need for clearer explanations of cellular mechanisms.
- **3.Ideate:** Brainstorm and explore a wide range of ideas and potential explanations, including innovative diagrams or models.
- **4.Prototype:** Simulate and build educational tools or visuals to enhance comprehension.

Understanding Camp

What is camp?

Camp is a sensibility that appreciates the artificial, exaggerated, and theatrical. It's about loving things because they are awful, or rather, because their awfulness is so extreme that it becomes fascinating and even beautiful.
