

(An Autonomous Institution)

Unit II and III important Questions

2 marks

Unit II

- Expand SPaT and MAP, Elaborate shortly need of this technology
- Relate Simulation and Connected Vehicle
- Infer Automotive security application in CV
- Label the need of Data standards in Connected Vehicle
- Relate Data capture in CV infrastructure
- Discuss Simulation development in the CV

Unit III

- How Data security plays vital role in CV
- Infer shortly on Secured development in Connected vehicle
- Summarise importance of cryptography
- List the importance of Cyber security standards, indicate few

Big Questions

Unit II

- Elaborate about the Cyber security need in the CV
- Distinguish SPaT and MAP data preparation, discuss elaborately
- List and discuss elaborately applications of Automotive security system involved in the CV
- Elaborate Data standards involve in the connected vehicle
- Discuss on Connected vehicle simulation need in the modern era

SNS COLLEGE OF TECHNOLOGY, COIMBATORE - 641 035

(An Autonomous Institution)

Unit III

- Secure vehicle-to-vehicle safety application communication
- Distinguish elaborately Secure communication protocols and Secure development
- Write a case study on Cyber security standards: secure communication protocols
- Enumerate applications of Secure vehicle-to-vehicle safety application communication
- Distinguish importance of Secure development and Secure platforms
- Write Case study on Cyber security standards: secure communication protocols and secure development
