

Realizing Existence as Co-existence at All Levels

Existence as Units in Space

Existence is whatever exists. There are two types of basic realities in existence – one is space and the other is units. The units are in space.

Understanding Units and Space

There are innumerable units in existence. There is air, water, soil, earth, sun, moon, plants, trees, animals, birds, human beings etc. These units are in space. The co-existence of the two is in the form of units submerged in space.

Units are Limited in Size; Space is Unlimited

We can observe units all around – they are limited in size. Coming to space, it is unlimited. It is spread all around. It is all-pervading. There is no limited size of space. It does not have any boundary.

Units are Activity, they are Active; Space is “No-Activity”

Every unit is an activity and it is active with other units. In itself, one or the other kind of activity is always taking place in the unit. Further, the unit is interacting with other units, i.e. it is active in relation to other units. When it comes to space, it is no-activity. There is activity only in the units.

Understanding Submergence

Units are in space – they are submerged in space. It means units are in space, they are inseparable from space. Where ever a unit is there, space is also there.

1. Units are Energised in Space

Being in co-existence with space, every unit is energised, right from the smallest atom to the largest planet.

2. Units are Self-organised in Space

Being in co-existence with space, every unit is self-organised. It is in a definite order. By being in a definite order, it exhibits a definite conduct – that is how one can identify or recognise and study that unit.

3. Units Recognise their Relationship and Fulfil it with Every Other Unit in Space

Being in co-existence with space, every unit recognises its relationship with every other unit in space and fulfils that relationship.

Existence as Co-existence – Units Submerged in Space

Existence is co-existence. It is in the form of units submerged in space. In the light of above discussion on existence as co-existence, we can now visualise the overall picture of the whole existence.

Key Takeaways

Existence is co-existence, which is in the form of units submerged in space. Units are energised, they are self-organised and they recognise their relationship with other units and participate with them in a mutually fulfilling manner (except for human beings without right understanding).
