SNS COLLEGE OF TECHNOLOGY<br>(An Autonomous Institution)<br>19MAT202 - STATISTICS AND NUMERICAL METHODS<br>16 mark Questions and Answers

The following table shows the lives in hrs. of four brands of electric lamps.
A: $\begin{array}{llllllll}1610 & 1610 & 1650 & 1680 & 1700 & 1720 & 1800\end{array}$
B: $\begin{array}{llllll}1580 & 1640 & 1640 & 1700 & 1750\end{array}$
C: 14601550160016201640166017401820
D: $\begin{array}{lllllll}1510 & 1520 & 1530 & 1570 & 1600 & 1680\end{array}$
Perform an analysis of variance and test the homogeneity of the mean lives of the 4 brands of lamps.
2. To study the performance of three detergents and three different water temperature the following
'whiteness' readings were obtained with designed equipment.

| Water <br> temp. | Detergent <br> A | Detergent <br> B | Detergent <br> B |
| :--- | :--- | :--- | :--- |
| Cold <br> water | 57 | 55 | 67 |
| Warm <br> water | 49 | 52 | 68 |
| Hot <br> water | 54 | 46 | 58 |

Perform a two way analysis of variance, using 5\% level of significance.
3. A tea company appointsd four salesman $A, B, C$ and $D$ and observes their sales in three seasons,
summer, winter and monsoon. The figures are given in the following table.

| Seasons | Salesman |  |  |  | Seasons <br>  <br>  <br> total |
| :--- | :--- | :--- | :--- | :--- | :--- |
|  | B | C | D | 128 |  |
| Winter | 36 | 36 | 21 | 35 | 120 |
| monsoon | 28 | 26 | 29 | 31 | 32 |
| Salesman's <br> total | 90 | 93 | 81 | 96 | 360 |

i) Do the salesman significantly differ in performance?
ii) Is there significant difference between the seasons?
4. Analysis the variance in the latin square of yields paddy where $P, Q, R$ and $S$ denote the difference
methods of cultivation
S122 P121 P123 Q122
Q124 R123 P122 S125

P120 Q199 S120 R121
R122 S123 Q121 P122
Examine whether the different methods of cultivation have given significantly different yields.
5. The following table shows the lives in hours of four brands of electric lamps

| $A$ | 1610 | 1610 | 1650 | 1680 | 1700 | 1720 | 1800 |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| $B$ | 1580 | 1640 | 1640 | 1700 | 1750 |  |  |  |
| $C$ | 1460 | 1550 | 1600 | 1620 | 1640 | 1660 | 1740 | 1820 |
| $D$ | 1510 | 1520 | 1530 | 1570 | 1600 | 1680 |  |  |

Illustrate, Analysis of variance and test the homogeneity of the mean lives of the 4 brands of lamps.
6. Three different machines are used for a production. On the basis of the outputs. Set up a one way ANOVA table and test whether the machines are equally effective.

## Outputs

Machine I Machine II Machine III

| 10 | 9 | 20 |
| :--- | :--- | :--- |
| 15 | 7 | 16 |
| 11 | 5 | 10 |
| 10 | 6 | 14 |
